- ▣ Easy & Waterproof Washdown
- ▣ Stocked and Custom Sizes Available
- ▣ Horizontal Slide, Hinged, or Vertical Lifting Operation
- ▣ Optional Window with Blackout Cover
- ▣ Aluminum Construction
- ▣ Magnetic Lock (Optional)

Grow Controlled is proud to offer a range of doors, becoming the new standard for grow facilities. Our Growtight doors are either hinged or slide horizontally on the aluminum track. Having the ability to completely seal a room not only contains odor, but eliminates vapor drive, completely isolating the atmosphere within a room for ultimate control. This will also allow the operator to maintain our GC PA grow method, opening a new world of growing and dry/cure regimes.

All doors are constructed with an aluminum framework around the perimeter, and incorporates standard IMP for the leaf. The doors come completely assembled and ready to install.
