

# GC420 HANDHELD CO<sub>2</sub> ANALYSER

The GC420 is a handheld, battery powered analyzer that displays realtime carbon dioxide levels in the surrounding atmosphere. Furthermore, for added detail, the screen also shows temperature and relative humidity levels. A single push of the button turns the analyzer on, and after a period of a few minutes, it automatically shuts off to preserve battery life.

Calibration of the GC420 analyzer is easy: while outside in fresh air, simply hold the button for a few seconds, and the screen will read ZERO CAL.

Spot checking and knowing realtime readings from the GC420 offers a layer of redundancy to check against readings from other safety and sensor devices.

## FEATURES

- ▣ Portable & Battery Powered for Flexibility
- ▣ Measures CO<sub>2</sub>, Temperature, and RH Levels
- ▣ Simple to Use
- ▣ Low Maintenance & Simple to Calibrate
- ▣ Automatic Power Saving
- ▣ Safety & Redundancy Assurance at a Glance
